

Preliminary declaration of use of property

The undersigned: _____ (name of representative) acting in the name and on behalf of
_____ (company)
_____ (seat)

as the person entitled to make a declaration, I declare that in order to establish the endpoint of the electronic communications service included in the offer of **Invitech ICT Services Ltd.** (registered office: H-1013 Budapest Krisztina krt. 39., Hungary), I give my preliminary consent, or shall procure the preliminary consent of the owner, maintainer or manager of the properties comprising the affected sites of installation, for Invitech to carry out the technical survey and implement the communication and development work required for the installation of the service as part of the site visit.

The condition of starting the installation is submission of the property endpoint contact information (**please submit with the order**)

Service endpoint (site) address:	Title of property use:	Endpoint contact details:
Postal code / settlement / street / house number	Owner / maintainer / manager / tenant / Other:	Name / telephone / email address

Prior to carrying out the service installation on each service endpoint, Invitech initiates coordination with the owner of the property or his representative to jointly agree on the details of the installation of the communications service and on the cabling route. As a result of this, Invitech prepares the technical survey report, which it has approved by the owner, maintainer or operator of the property, in the form of an owner's declaration.

The tariffs of the service and the installation deadline have been determined on the assumption that the owner, maintainer or operator of the property has consented to the performance of the envisaged communications development works on the basis of the technical coordination within reasonable time and free of costs.

The installation deadline shall be calculated from the entry into force of the contract or, if the owner's consent is not received by Invitech no later than the **5th working day** following the entry into force of the contract, or from the receipt of the owner's consent.

If the local survey cannot be carried out for the lack of this declaration, or if the owner of the property refuses to give his consent to the completion of the communications works, Invitech will waive all resultant liability, expressly but not exclusively damages related to the delay or failure to start the provision of the service.

If the contract for the provision of the communications service to be installed is not concluded for any reason, this declaration will become invalid.

If an order is placed, please immediately return this statement or a copy of the original image, but no later than **within 5 working days** of receipt, to your Invitech representative (or contributor) at one of the contact details provided.
